COUNTRIES

HOUSTON

We maintain a large commercial presence in Houston (along with Singapore and London) to service our customers across time zones. We also host our shipmanagement in Houston to support our Atlantic operations.

GALVESTON

Galveston is the Centre of Excellence of all lightering support activities for AET's global ship-to-ship operations, and is the home base to AET's fleet of Lightering Support Vessels. The facility was recently revamped with a new dock.

RIO DE JANEIRO

In 2019, we moved into a larger office in Rio de Janeiro to support our growing lightering business and DPST fleet in Latin America. Our increased headcount expands our touchpoints with customers and strengthens our relationships.

MONTEVIDEO

Our Joint Venture office supports the lightering operations in Uruguay.

STAVANGER

With an expanding fleet of DPSTs operating in the North Sea, our physical presence in Norway enables better service and customer relationships.

KUALA LUMPUR

Our office in Kuala Lumpur liaises with our shipmanagement and crew operations in Malaysia, and supports commercial operations for our fleet operating in the Asia Pacific region.

LABUAN

In 2020, we reorganised our corporate structure, incorporating our global holding company in Singapore. 40% of our vessels are Singapore-flagged and approximately 50% of our onshore staff are in Singapore.

LONDON

SINGAPORE
