

KEY MATERIAL ISSUES AND OUR STAKEHOLDER UNIVERSE

KEY MATERIAL ISSUES

Our materiality methodology uses a stakeholder-management and data-driven approach to evaluate both internal and external perspectives to produce a list of material topics that AET stakeholders were most concerned about. A materiality matrix ranked these issues and the relevant UNSDGs based on the level of importance to AET and our stakeholders. This enabled us to identify and prioritise specific risks and opportunities to improve our priorities, practices and shareholder value.

Materiality Matrix

Selecting Material Topics

Our materiality assessment is aligned with MISC Group's methodology where stakeholders were asked to rank the identified material matters based on importance to the business and our stakeholders. The top-ranked material matters were then identified and presented in a graphical format to senior leadership.

OUR STAKEHOLDER UNIVERSE

AET is committed to elevating the maritime sector by having a positive impact on local and international communities. This commitment, supported by our stakeholder engagement strategy, creates value through awareness, dialogue and collaboration.

Key Stakeholder Groups

Who Are Our Stakeholders?

We identify relevant stakeholders by considering their particular attributes and scope of involvement. The relevant stakeholders are groups or individuals who are directly or indirectly affected by our operations and activities or have the potential to impact AET.

We have established a structured stakeholder engagement process and a stakeholder-inclusive approach to creating value. Stakeholder engagement is integrated into every step of our value creation process.

Our Principles of Engagement and Platforms
