

OUR GLOBAL OPERATIONS

- Lightering
- DPST
- Mid-Size Tanker (MST)
- MCV
- Product/Chemical
- VLCC
- MST trade
- Key VLCC trade

● Lightering: the US Gulf

We are a market leader in the US Gulf lightering sector, with a track record of more than 15,000 STS transfers completed

● Lightering: Latin America

We continue to expand our presence in Latin America with over 570 STS operations completed in Uruguay and Brazil

● DPST: Brazil

We are a market leader with 13 DPSTs operating in Brazil

● MST: Atlantic and Pacific Regions

Our MST fleet generally operates in the Atlantic and Pacific regions either on spot or period charters

● MCV: the US Gulf

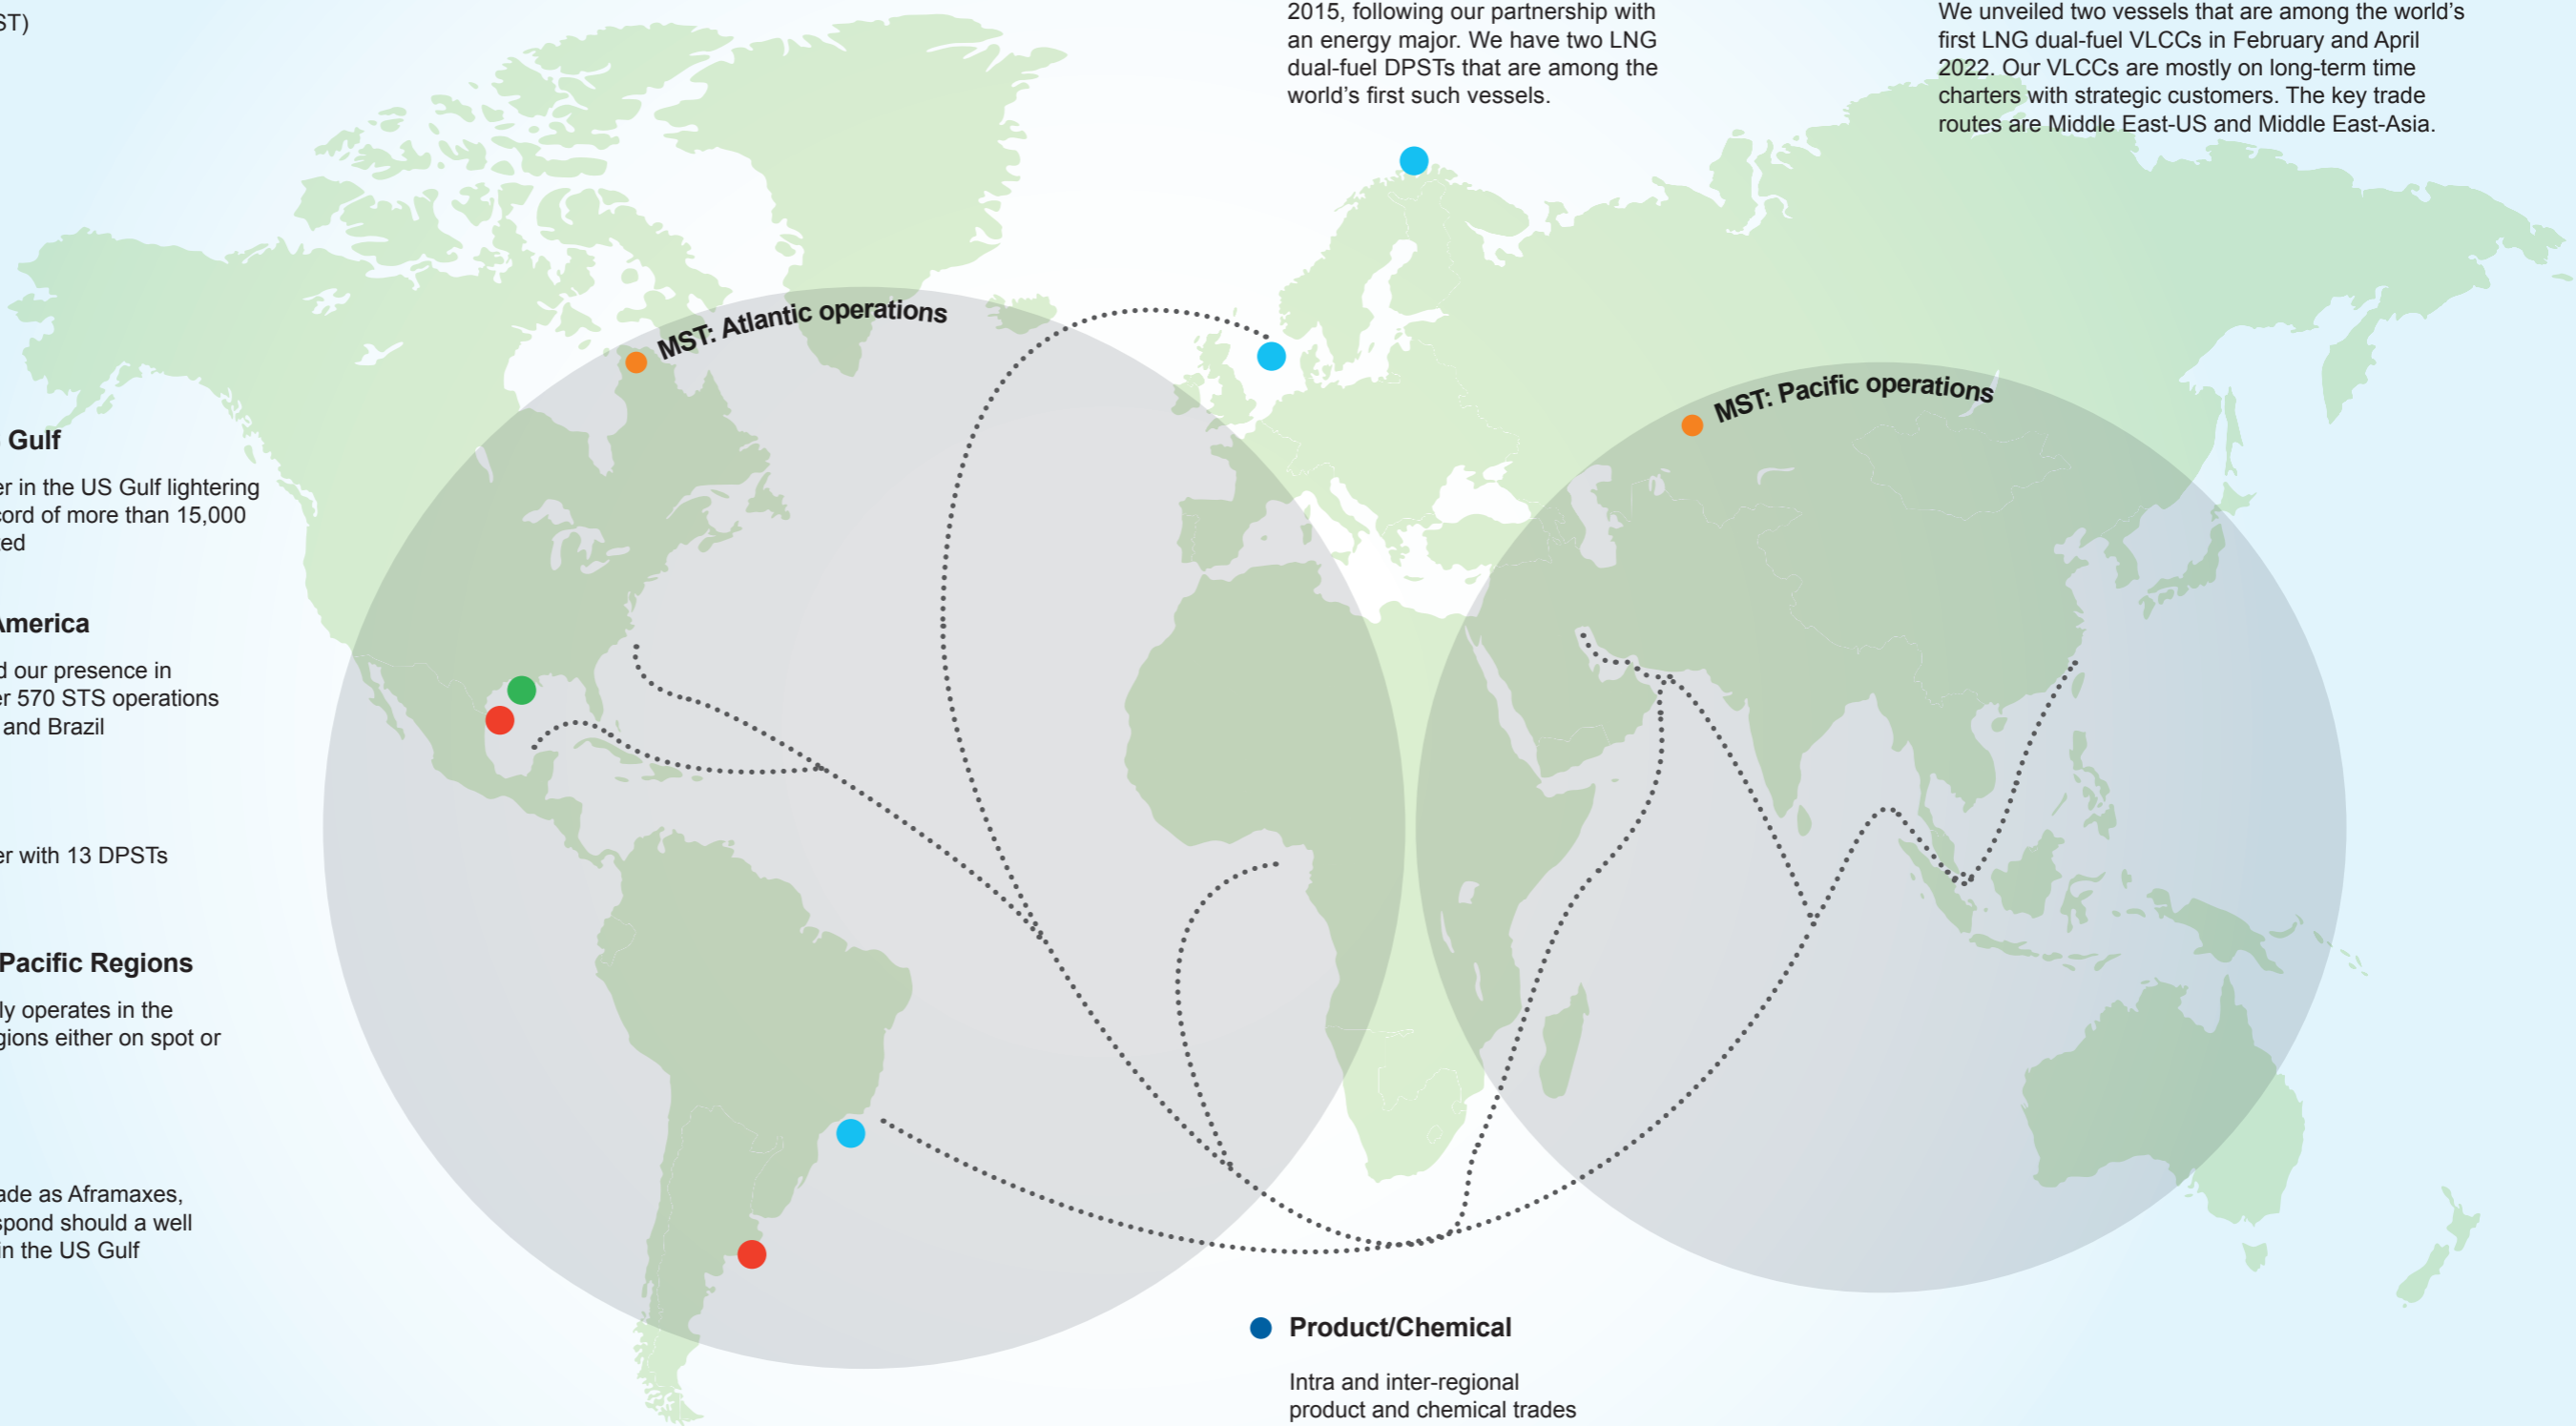

Our MCVs normally trade as Aframaxes, with a readiness to respond should a well control incident occur in the US Gulf

● DPST: North and Barents Seas

We boast a strong regional presence in the DPST market since 2015, following our partnership with an energy major. We have two LNG dual-fuel DPSTs that are among the world's first such vessels.

● VLCC: Global Trading

We are among the top 20 global players in this segment with 13 vessels, including three on order. We unveiled two vessels that are among the world's first LNG dual-fuel VLCCs in February and April 2022. Our VLCCs are mostly on long-term time charters with strategic customers. The key trade routes are Middle East-US and Middle East-Asia.

● Product/Chemical

Intra and inter-regional product and chemical trades
